Technical Skills

- **Programming Languages**: Python, C, C++, Java, JavaScript.
- **Backend & Web Development:** Node.js, Express.js, Flask, Django, REST APIs
- **Cloud & DevOps:** Docker, Git, GitHub, Google Cloud, Microsoft Azure, CI/CD
- **Data Visualization & Analysis**: Matplotlib, NumPy, Pandas
- **Tools**: TensorFlow, Scikit Learn
- **Soft Skills:** Analytical Thinking, Communication, Leadership, Problem Solving

Internships

Infosys Springboard – Virtual Internship | GitHub *Jul 2025– Nov 2025*

- Built a real-time **Smart Traffic Management System** using **YOLOv5, OpenCV, and Tesseract OCR**, achieving **94% vehicle detection accuracy** while processing **25+ FPS live video streams**.
- Developed a modular **ANPR + ATCC pipeline** supporting **5+ vehicle classes**, automating congestion analysis and reducing manual traffic survey effort by **80%**.
- Deployed a **Dockerized microservices architecture** with **Python, Flask, Streamlit, and SQLite**, enabling scalable multi-camera processing and improving overall system reliability to **99% uptime during stress testing**.

Microsoft Azure AI Intern | Microsoft via Edunet | GitHub *Jun 2025– Aug 2025*

- Engineered a secure **GUI-based system call interface** using **python-ptrace and psutil**, reducing unauthorized system call attempts by **70%** through strict validation and policy enforcement.
- Built a real-time **security monitoring and audit pipeline** tracking **150+ system metrics**, achieving **95% detection accuracy** in simulated threat scenarios.
- Evolved a **Role-Based Access Control (RBAC)** with structured SQLite logging, resulting in **zero successful privilege escalation incidents during controlled penetration testing**.

Projects

Blockchain-Powered Logistics System |Python, SQL, AWS S3, Pandas, SQLite | GitHub *Aug 2025 - Sep 2025*

- Architected a **blockchain-based supply chain tracking system** ensuring tamper-proof transaction logging, improving shipment traceability by **100% across simulated logistics workflows**.
- Designed a normalized **relational database schema (SQL + SQLite)** handling authentication, inventory, and shipment records, optimizing query performance by **40% through indexing and schema optimization**.
- Implemented a relational database schema with SQL to handle user authentication, inventory tracking, and shipment records. Integrated **AWS S3 for secure digital contract storage** and applied **Pandas-based analytics** to identify delivery bottlenecks, reducing simulated route inefficiencies by **25%** through data-driven optimization.

AI Chatbot for Symptom Analysis | Python, NLP, Flask | GitHub *Mar 2024 – Apr 2024*

- Advanced an NLP-powered **medical symptom analysis chatbot** serving **500+ users**, delivering real-time health insights with structured conversational flow.
- Improved model prediction accuracy by **30%** via hyperparameter tuning, TF-IDF vectorization, and multi-model evaluation (Logistic Regression, SVM, Naive Bayes).
- Enhanced a **Flask-based backend API system**, reducing average response time by **35%** and achieving **98% uptime** during user testing.

Certificates

- Deloitte Technology Virtual Experience | Forage | Link *Oct 2025*
- Google AI Essentials| Google via Coursera | Link *Sep 2025*
- Google Gemini Certified Educator – Link *Sep 2025*
- Building Agentic AI Applications | Programming Pathshala | Link *Jul 2025*

Co-Curricular Activities

- Selected officially as a Google Student Ambassador, representing Google at events on campus and spearheading campaigns to boost student adoption of AI and developer engagement. Organized technical workshops and awareness campaigns reaching 500+ students to increase adoption of Google developer tools.
- Demonstrated consistency, problem-solving abilities, and solid foundations in algorithms and data structures by completing the 100+ Days of LeetCode Challenge.
- Delivered end-to-end AI projects under **industry mentorship**, meeting all evaluation and performance benchmarks.
- Filed a **patent** on **AI-powered dream recording system** integrating neural data analysis and mobile application visualization.

Education

- **Lovely Professional University** Phagwara, Punjab
- *Bachelor of Technology - Computer Science and Engineering;* ***CGPA: 8.08*** *Aug 2023 - Present*
- **Sri Chaitanya Junior College** Hyderabad, Telangana
- *Senior Secondary;* ***CGPA: 9.6*** *Apr 2021 – Mar 2023*
- **Sri Chaitanya Techno School** Hyderabad, Telangana
- *Schooling;* ***CGPA: 10.0*** *Apr 2020 - Mar 2021*
